

Give Me Love

Maverick Sabre

She walks in the room and decides
And I wonder honey
So come on and ask to a???
And she tells me her name
She's a pretty little pirate sink
I would be an island mix
Beauty like a violet and her hands are like a diamond ring
'Cause see her looking right to me
And when she moves I take the floor that she saw, obvious
Give me love, give me love
Give me love and attention my dear
Don't you want, don't you want
Anything that I am offering So then we start to conversating
She told me how she's educated
She told me how she felt amazing
And achieving and succeeding ain't her only aiming
Spiritual woman who loves her heritage
She gave me her number think it was evident
She told me to call her when she was???
I saved my number out of specialty Give me love, give me love
Give me love and attention my dear
Don't you want, don't you want
Anything that I am offering
Do you mind if we stay all night
Tell me tales of your life
Share your wisdom with mine
Impress your up greed
Keep your crown over me
Think I found what I need
If this is really what you thinking
Give me love
