Looked Into the Wings

Billy Gilman

I could feel you reaching out for me before we ever touched
And I knew you would always be someone I could trust
I felt your presence through the good times and the bad
You kept the faith you always hadWhen you saw me getting nowhere, trying to find a new direction
For a stubborn little voice that said, I didn't have a prayer
When my star began to fade and I found the stage was bare
I looked into the wings and you were thereI felt like I was falling, going over the edge
And in this new altitude, I couldn't catch my breath
I turned my face to heaven and it was then I realized
My guardian angel was here by my sideWhen you saw me getting nowhere trying to find a new direction
For that stubborn little voice that said, I didn't have a prayer
When my star began to fade and I found the stage was bare
I looked into the wings and you were thereThis song belongs to you
And you know every word is true
I always knew that I'd be lost without youWhen my star began to fade and I found the stage was bare
I looked into the wings, I looked into the wings
I looked into the wings and you were there
