Pack Of Thieves

Enter Shikari

Here behind those eyes
There is something you should know [x2]
Change cannot be subject to conditional falls
'Cos we're squatting in a system
That consistantly stalls
Don't be fooled into thinking
That a small group of friends
Cannot change the world
That's the only thing they'll ever have
The only thing they'll ever have
Stand Up
Stand Up [x2]
Here behind those eyes
There is something you should know
Behind those eyes
We reach through their callous disguise
Into fortresses where they fabricate
Whitewash and lies
We're all fooled into living
With a small pack of thieves
That distort the world

That's what this antique structure creates
Stand up
Stand up [x2]
Here behind those eyes
There is something you should know
We are all connected
We are all collected here
Now change the world
We blast behind those eyes
Slash through to the cortex
Gut wrenching business
Caught off guard
Not psyched for the vortex
This can't be real!
Here behind those eyes
There is something you should know [x2]
Don't be fooled into thinking

That a small group of friends
Cannot change the world!
