Insane

BTOB

(Oh oh oh oh oh oh oh Baby without you)When I walked you back home, it was the house of another guy
I felt like you always walked a bit farther from me when there were a lot of people
Just like a big balloon shrinking down, we have cooled down
I cant hide my frustrated heart
What went wrong?Its always the same as last night you turn away from me
Im so tired of me always being the clingy one
Because to me, it was always you I always trusted you
So every night its lonely, miserable, tiringI will leave for you so I will get to hate you
Now I wont cling onto you anymore
Im gonna be better its better if Im not here
Especially today, you have so many secretsYou make me go insane
She gives me so much pain
I wont be back again I wanna hate you
(You always pretend nothing is wrong
Did you have to pick up the phone right now?)
You make me go insane
She gives me so much pain
I wont be back againEvery night, you always turn away from me
(Going back before I met you ridin now, say goodbye)
Although its hard to let you go without regretIt still hasnt hit me yet about you
The promises we made are gone with the wind
The only remaining thing is your cold eyes
Like a wretch, I still miss your smile
I hate myself for that -
I still cant acknowledge that its the end for you and me
I wish I could dieI will leave for you so I will get to hate you
Now I wont cling onto you anymore
Im gonna be better its better if Im not here
Especially today, you have so many secretsYou make me go insane
She gives me so much pain
I wont be back again I wanna hate you
(You always pretend nothing is wrong
Did you have to pick up the phone right now?)
You make me go insane
She gives me so much pain
I wont be back againThe memories of when I first saw you become faint
The love swing has stopped
I board the train that will never come back
Ill let you go Ill let you goIll throw it all away, now Ill let it all go

You can leave now
Dont ever look for me though my heart hurts
So I can forget youI will leave for you so I will get to hate you
Now I wont cling onto you anymore
Im gonna be better its better if Im not here
Especially today, you have so many secretsYou make me go insane
She gives me so much pain
I wont be back again I wanna hate you
(You always pretend nothing is wrong
Did you have to pick up the phone right now?)
You make me go insane
She gives me so much pain
I wont be back again
