

# Your Shadow

**John Foxx & Louis Gordon**

And the watch says midday  
And the calendar says it's dark outside  
And the tv says it's midnight  
And you vanish in the falling light And you  
You leave your shadow behind  
Yes you  
You leave your shadow behind And we talk in cascades  
And we're living by strange designs  
And there's something almost splendid  
In all this tangled time And you  
You leave your shadow behind  
Yes you  
You leave your shadow behind  
You leave your shadow...  
You leave your shadow...  
You leave your shadow...  
You leave your shadow...
