The Units

Welcome to the mission

My music has got to get what it rightfully deserve

Shaggy

My music got me on a mission, I'm following my intuition Why don't you check the composition

With this ya music when it hit you, say you feel no pain My music got me on a mission, I'm following my intuition

Why don't you check the composition

With this ya music when it hits you

My music is my mission, I'm here to take it around the world To get the global recognition that we fully deserve To every man, every woman, little boys, little girls

Embrace the sweet reggae culture, there's a lot more to learn You could a be from the east, could a be from the west

Could a be from the north, so could a be from the south

No matter where down in a the world
