[spoken]

And here's the weirdest part about that story,  
the guy was so upset that she ripped him off for his money  
she was actually wedged under the front - I told you about that  
- under the front of a firebird and he's trying to get the ten dollars of rock back out of her hat  
while she's wedged under the car.

I think that

- I shit you not she was actually wedged under the front

- I told you about that

- yeah under the front of the firebird

- she was actually wedged under the front

- I told you about that...[sung]

I fall down

You get up
