Fat Lip

Andrew Pants

I can't believe it, it happens each day
It's ill conceived, just throw it away
To watch the waitin' time slippin' away
It won't be long nowI hold the moment, the hour is sublime
It's hard believin', dancin' with time
To watch the waiting time slippin' away
It won't be long nowDown at the landing when the boats come in
People stand in line
Close by the water where the fishes swim
Round and round to pass the timeBut you know it's gonna get there
Around and around it's gonna spinOut at the airport where the planes come in
People buzzin' like flies
Out at the airport where the planes come in
See the hours go flashin' byBut you know it's gonna get there
Around and around it's gonna spinDown at the station where the trains come in
Never make it on time
Down at the station where the trains come in
See my friends all walk the lineBut you know they're gonna get there
Around and around they're gonna spinView it all with suspicion, view it all and despise
View it all with suspicion, view it all with my eyes
