

Anxiety Asking

Turning Point

(Originally by Ignition)Paranoia - makes yourself feel good

Indecision - striking and wrecking

You're a sucker to the whole world

And its' tearing you down

What do you do when it twists around

What do you do, you never had a chance

Killed yourself and your fighting chance

Just wasting time tying your mind

Anxiety asking, tension telling

What you never want to know

So you quit while you're ahead

To save yourself, can't you see farther than that?

You say it's hard for you to change

You say it's hard to stay the same
