

# Never Say Never

## Audiostrobelight

I'm sick of what you told me, of what lies on the road ahead  
Big crowds big lights and the highway  
One day I'm sure it's destined to end  
Where do you think we're going?  
Our lives are intertwined  
Just think about all the high times  
One day I'm sure they will arrive  
You'll never, never, never understand  
Why we never got that far why we never wanted more  
With the clouds in my eyes,  
The breath in my chest  
Dear friends we were never second best  
We're almost there  
Not ashamed of the scene that we found in shambles:  
Like wreckage from a quake  
We've slowly become so stagnant and I think it's more than I can take  
Of them and their downward spiral  
Of this end leading to a means  
it's all or nothing from here on out  
tomorrow night I hope will bring:  
big lights our time  
These dreams this life  
(Chorus)  
I'll bring the shotgun and you bring the bass  
We'll live for this moment, we'll die by our ways (Repeat x2)  
Hold hope close  
(Chorus)
