

Never There

Strata

I am on the brink of losing everything
Hanging on the edge of every word she says
And you were never there
You were never thereShe stabs deep into me
Am I too blind to see what this has done to me?
She stabs deep into me
Am I too numb to feel this anymore?You were the one who could save me
You were the one who abandoned me
I am patiently waiting here to see
Which of us survives when all of this collides with realityShe stabs deep into me
Am I too blind to see what this has done to me?
She stabs deep into me
Am I too numb to feel this anymore?You were never there
You were never there
You were never there
You were neverShe stabs deep into me
Am I too blind to see what this has done to me?
She stabs deep into me
Am I too numb to feel this anymore?You were never there
You were never there
You were never there
You were never there
