

# Save Ourselves

## Kt Mulholland

Let's have some fun  
Let's get electrified  
Turned up inside our minds  
Let's string electric lights around our heads  
I love a mess!

Don't it feel nice  
Soul powered turbo fire  
Oh the way that our lips speak the words that we missed  
When we kiss don't it feel nice

We better save ourselves  
Let me tell you a little something about ourselves  
It's all in our heads  
It's all in our heads  
Right! right

Let's make some love  
Let's get in touch tonight  
Slip through the cracks in the boards  
While we lay on the floor turned up  
Way up  
Don't it feel nice  
Connecting eye to eye  
We're such a wonderful mess when we're looking our best  
Being alive  
Don't it feel nice

We better save ourselves  
Let me tell you a little something about ourselves  
It's all in our heads  
It's all in our heads  
Right! right

We better save ourselves  
Let me tell you a little something about ourselves  
It's all in our heads  
It's all in our heads  
Right! right
