

Lisbon

Wolf Alice

You're gonna look at me twice, it's eventual
You're there when you're not 'cause
I'm smoking your Menthols
Smoking your Menthols I'm wearing all your clothes again
They're wearing thin but it's one way to
Be together
Be together
Swallow the fear
My stone cold fox
My arms are here
I've been ready for so long
And I would lick your wounds and care
Feel like running, feel like crack
Feel like going out and smashing windows
I'm smashing windows
And in a black, black hole, deeper than death
I'll wait for you there just give me the breath to say it
Back together Swallow the fear
My stone cold fox
My arms are here
I've been ready for so long
And I would lick your wounds and care
Feel like running, feel like crack
Feel like going out and smashing windows
I'm smashing windows
And in a black, black hole, deeper than death
I'll wait for you there just give me a breath to say it
Back together
