

# Friend

## Pink Martini & The von Trapps

We were friends  
When we were children  
When we were learning  
Of this wild world  
Smiled and clapped  
Runin' through the tall green grass  
Saving up our love to last  
Longer than a year Still we watch the heavens turn  
Stars said that our lights would brightly burn  
So we searched our hearts of flame  
'Till the day we went our separate ways...Friend  
'Till we meet again  
And together face the end  
Burning through dark  
Like the shooting stars we mark  
The blackness of the sky Flame will throw a fire in our heart  
Fire raging like the sun  
Until the race is run  
And when the fight is done  
We'll smile like we did When we were children Sunrise  
Chasin' of the night's lights  
An arrow head the light strikes  
Our heart turned into stone As I've grown  
I've not forgot the seeds we've sown  
And slept beneath the cold white snow  
And prosper in the spring timw  
Ah-ah-ah, ah Still we watch the heavens swirl  
Desperately we chase the stars that whirl  
Now our hearts are all ablaze  
Racin' always racin' on their way Friend  
'Till we meet again  
And together face the end  
Burning through dark  
Like the shooting stars we mark  
The blackness of the sky Though now we walk a wild and weary rode  
And the world is deadly cold  
We are devil bold  
As we smile like we did When we were children  
When we were learning

Of this wild world...
