

# Blood

## Blackfield

I see the happy family tree  
It sways so easily  
We're smiling all the time  
This world just isn't mine  
We watch it burn and we never learn  
This can't be what you're waiting for  
Staring into the sun, we eat our young  
This can't be what you're waiting for  
Just take it easy on yourself  
Forget all the stupid things we say

I know you beat up on yourself  
I know, I know it's in your blood  
You say what no one understands  
The seeds are in your hands  
The branches break your bones  
I can't just leave you alone and watch you squirm  
And I can't bring myself to look  
I rip the pages from the book and watch it burn  
It's in your blood
