Stay the Night

George Ducas

Girl, every time I look into your eyes
I feel like falling, just look my way again
From where you stand, I can almost take your hand
And pull you close to me what would you say if we shared
One more slow glance and an even slower danceStay the night, stay the night
It's too late to walk away and too soon to say goodbye
We've already fallen way too far to fight
Stay the night stay the nightI know your kiss would just like
Honey drip into my heart
One taste would take my strength away
I can feel the moon pulling me to youStay the night, stay the night
It's too late to walk away and too soon to say goodbye
We've already fallen way too far to fight
Stay the night stay the night
