

Cadaver Love Song

Icarus Himself

You touched my heart, stitched me closed
in the tank, I was home, in the tank, I was home

Formaldehyde filled my brain, but your voice kept me awake
but your voice kept me awake

I remember the words that you spoke.
I'll be with you when my eyes are cold

You felt a spark, took a hold
to my hand how it was cold, to my hand how it was cold

Disassemble and cremate, on my bed we'll have a wake
on my bed we'll have a wake

I remember the words that you spoke
I'll be with you when my eyes are cold
I'll be with you when my eyes are cold
