

Victoria

Jordan Bratton

[Hook]

I'm traveling up through the waterfall
The mountain safe and angels can guard us all
Now what you gonna do when you're savior comes
Cause you just wanna form when the potter callsGo back to the time and place
Where I needed you to stay
Bring back the universe to the never run away
And it feels so right
Or it used to feel so right[Verse 1]
You wanna leave now
You won't believe what i found
A new love
Hate turning upside down
Now come with me now
Cause it was me that i found
A love I've never known
Running to my soul[Verse 2]
So chose right now
You wanna walk or you wanna run
Just know the travel is hard
And the energy it ain't enoughSo choose right now
If you glide or you wanna run
And if its love that you need
I promise i can give you some[Hook]
I'm traveling up through the waterfall
The mountain safe and angels can guard us all
Now what you gonna do when you're savior comes
Cause you just wanna form when the potter callsGo back to the time and place
Where I needed you to stay
Bring back the universe and then never run away
And it feels so right
Or it used to feel so right[Transition]
When you fly your heart should go
So if you wanna leave baby let me know
And you jumped in the water before you felt the flames
So if by chance you think we feel the sameSo now you caught me living in my midnight rage
I swear you caught me living in my midnight rage
So baby don't try to run from the midnight rage
And i found my way out just before the sun came
