## Gorillaz

You couldn't escape this music even if your name's Houdini  
Our tracks, they last for Life and don't disappear like a genie  
Communicating through your airwaves like a giant C.B.  
'Cause this one's for your radios over, do you receive me? Our music is so hot, it feels like the sun in Tahiti  
We rickety rock, Gorillaz style is buck wild, believe me  
We heavyweights who phase ya like Ali did with Frasier  
We spit the most flava but musically we'll amaze ya We've been blessed and we've been gifted like Jesus in His  
manger  
Won't you shout Hallelujah! Here comes your music savior?  
From your heart to your mind, your spirits to your souls  
We come to take control with the Gorillaz on patrol See, our rhymes possess the powers of a superhero  
Supernaturally, we rock the mic but wit' a natural flow  
If you didn't know before, you know now, we told you so  
Gorillaz rock your dome just like the one in Tokyo It's a hard dream to contemplate, I could fall into the abyss  
And I love this interlude, it's the reason to deliver  
And they called onto me, says they came to talk to me though  
The more of us that lies, I guess kids don't live or die 'Cause we're makin' this music that's making you lose it  
So, people don't abuse it and there ain't no way for you to refuse it  
Gorillaz be the army that's startin' this party ardy  
Makin' more noise than carnivals mixed with the mardi gradi We're comin' through your town with the sound  
that's so profound  
Gorillaz with the rappers that straight from the underground  
We're tearin' it down, makin' you feel this sort of force  
Knockin' you to your senses and knockin' you off your course 'Cause we're the source, got you feelin' that so  
appealing  
We got you jumpin' around and bouncin' off of the ceiling  
Makin' music ya feeling from Baltimore into Bristol  
I know you're hearin' me 'cause my voice is clearer than crystal The casual, supernatural flows I be exposin'  
Makin' sure that you're frozen and makin' sure that I'm chosen  
To rip a score, we make you damage the dance floor  
Gorillaz and Phi Life'll give you what you ask for It's a hard dream to contemplate, I could fall into the abyss  
And I love this interlude, it's the reason to deliver  
And they called onto me, says they came to talk to me though  
The more of us that lies, I guess kids don't live or die Let Gorillaz be you guiding light and your shining star  
Whether you be home alone or drivin' in your car  
Don't matter who ya are, whether you be near or far  
You'll be feelin' entertained by our music repertoire See, our poems, they be flowin' like rivers and reservoirs  
'Cause Gorillaz, we be out in this world like men of mars  
We rap stars with supernatural spars

We leave your brains amazed with this super music of ours  
So put your hands up and stand up, it's time to get  
down

'Cause Gorillaz and Phi Life, we be breakin' you 'round

From the right to the left, from the skies to the ground

We're coverin' all angles and you can't escape the sound  
On the track, it's laid back, we've come to spray raps

Keep it chilled and relaxed but we still sound phat

It's like that, when we write raps

We're not from the empire but we still strike back  
So put your hands up and stand up, it's time to get down

Gorillaz and Phi Life, we be breakin' you 'round  
So put your hands up and stand up, it's time to get down

Gorillaz and Phi Life, we be breakin' you 'round  
So put your hands up and stand up, it's time to get down

Gorillaz and Phi Life, we be breakin' you 'round

....
