

# You Remember

## Gentleman

(You remember) When we used to write letters  
And we never used to send text messages  
(You remember) when there was no Facebook, no Youtube  
Never invalid the colleges  
(You remember) that technology's a good thing  
But many misuse it and cause pier damages  
The future is so great, but we can't forget the past (No) I'm passionate about this memory I got this feeling  
Question to the leaders and me ask them what them dealin'  
See seh that the world need a spiritual healin'  
What about the youth that we leavin'?  
Cyberspace take their mind only that them a believe in  
The elders get bitter so them stop from teachin'!  
Miles from the youth than how you ago reach him  
Tell me how you ago reach him We remembering the past but if there wasn't the past  
Just remembering seh there wouldn't be no future  
So I say it with all costs  
On your behalf just like how Christ died for the youths ya  
That's just a moment in time  
To mesmerize your mind you better acknowledge the truth ya  
If your objective is crime you keep bein' unkind  
Then your own weapon will shoot ya (You remember) When we used to write letters  
And we never used to send text messages  
(You remember) when there was no Facebook, no Youtube  
Never invalid the colleges  
(You remember) that technology's a good thing  
But many misuse it and cause pier damages  
The future is so great, can't forget the past (no) Certain good things happen in the past  
Now everything change everybody move fast  
And the youths me see dem act like dem lost  
Everybody wanna be a rebel without a cause  
(You remember) when we coulda hands out  
And a roll down south everybody coulda roll all about  
Now the tension so high like it want touch the sky  
Dem a plan now fi try get you out  
Mannerism is depleted the past is deleted  
Dem fi know life s more than a flaas  
And the children used to listen to the teacher  
Now the children dem a gwaan like dem a the teacher of the class  
Dem used to say thank you and good morning

Now not even question a ask  
But you can't blame the youth 'cause they don't know the truth  
There is no one to help them stick to the task (You remember) When we used to write letters  
And we never used to send text messages  
(You remember) when there was no Facebook, no Youtube  
Never invalid the colleges  
(You remember) that technology's a good thing  
But many misuse it and cause pier damages  
The future is so great, we can't forget the past (Can you remember) When we used to write letters  
And we never used to send text messages  
(Do you remember) when there was no Facebook, no Youtube  
Never invalid the colleges  
(You remember) that technology's a good thing  
But many misuse it and cause pier damages  
The future is so great, we can't forget the past (no) Remember, remember  
Ooh yeah  
(You remember) can you remember  
You, remember (You remember) When we used to write letters  
And we never used to send text messages  
(Do you remember) when there was no Facebook, no Youtube  
Never invalid the colleges  
(Can you remember) that technology's a good thing  
But many misuse it and cause pier damages  
The future is so great, we can't forget the past (Your remember)  
(Your remember)
