Sweet Memories

Aaron Morales

Since I was a child I always knew
The one thing in life I was born to do
Got a guitar at the age of nine
Started up a band with some friends of mine
Made no money and we didn't get far
But I got in Maggie's jeans in the back of my car
It wasn't all good and it's wasn't all bad
Tried to make the most of what I had

Look at years gone by, time sure flies
Look back and sigh, but don't you cry

Those sweet memories
Of how it used to be
Those sweet memories
Still come back to me

Nightclub days lost in a haze
Spent my money a million ways
Drank firewater till the well was dry
Started every morning with bloodshot eyes
Lived my life like a merry go round
Inside out and upside down
Lonely night and happy days
I think I finally found my way

Look at years gone by, time sure flies
Look back and sigh, but don't you cry

Those sweet memories
Of how it used to be
Those sweet memories
Still come back to me

Those sweet memories
Of how it used to be
Those sweet memories
Still come back to me
Memories
