

# American Leather

## Germes

Looking for a way out, I put my foot out of line  
Really like to break-out, I feel so confined  
American leather, the poisonous members  
Not alone, not together, their American leather  
Saw you on a dark road, brought myself along  
Got a sense of conflict but I know what's wrong  
American leather, the poisonous members  
Not alone, not together, their American leather  
American leather, the poisonous members  
Not alone, not together, their American leather  
I know that kinda feeling, so I built my place up high  
But you'll never find me kneeling, 'cause I'm too occupied  
American leather, the poisonous members  
Not alone, not together, their American leather
