

# Crossbow

## Hot Rod Circuit

I can't remember  
a single word you said  
didn't make much sense anyway You can't deliver  
the right words to say  
and I hope that you can Make some sense of statements you've made  
your lies and your claims  
curiosity is eating my brain  
I'm going insane Save yourself from drowning alone  
how long have you known  
curiosity is eating my bones  
how long have you known
