# Read My Sign

## Bell, Book & Candle

Hey, come and read my sign
I'm going higher with youI wonder if I'll stay alone
Time with you is far and gone
I wonder if you got someone
And I wish that it was meSudden impressions, see you come round the corner
Heart beatin' fast as if to steam up and warn you
I show my love, you cannot release
I never wanted to undress myself
I hate these lonely moments without youHey, come and read my sign
I'm going higher with you
Hey, come and read my sign
I'm going high, higher with youI wonder why I'm still alone
Seems to me, our love is done
I wonder if you're havin' fun
And I wish it was with meSudden affection makes me freeze as I see you
So glad to see, that there is nobody near you
Can't hide my love, I wanna retrieve
I never wanted to express myself
I hate these lonely moments without youHey, come and read my sign
I'm going higher with you
Hey, come and read my sign
I'm going high, higher with youHey, come and read my sign
I'm going higher with you
Hey, come and read my sign
I'm going high, higher with youI'm going higher with you
I'm going high, higher with youHey, come and read my sign
I'm going higher with you
Hey, come and read my sign
I'm going high, higher with you
