Stars

Bellamy Young

i lit a fire with the love u left behind and it burned wild and crept up the mountain side i followed your ashes into outer space i cant look at the window i cant look at this place i cant look at the stars they made me wonder where you are stars up on heavens burning flight and if i know you at all i know you've gone too far so i,i can look at the stars all those times we looked up at the sky looking out so far it felt like we could fly now i'm all alone in the dark of night i cant look at the window i cant see the light i cant look at the stars they made me wonder where you are stars up on heavens burning flight and if i know you at all i know you've gone too far so i,i can look at the stars stars they made me wonder where you are stars up on heavens burning flight and if i know u at all i know you've gone too far so i,i can look at the stars
