

# Val Jester

## The National

Build a fire for Val Jester  
Build a room for your love  
Take your time when you tell her  
How she lives in your blood You should've looked after her better  
You should've looked after her more  
You should've locked the door Fill her coat with weapons and help her get it on  
'Cause one day when she goes, she's gone You should've held on to her better  
You should've held on to her more  
You should've locked the door
