

Everyone Is Gonna Love Me Now (Demo)

Ingrid Michaelson

Stars are lighting up the parking lot
It came to me the second I forgot
You gotta let me go If I knew the way to less alone
Then it wouldn't sink me like a stone
Find the words to save
I wasn't born to fade Maybe I can go away
Where everyone is gonna love me now I was never right but never wrong
Everybody thought I'd finish strong
But I can get there soon
If you push me to the moon Maybe I can go away
Where everyone is gonna love me now Oh, maybe I can go away
Where everyone is gonna love me now Oh Where everyone is gonna love me now
