Take It Back

Squad Five-O

vicious words tear friends apart
i know it brings us down and i know its all my fault
i speak before i think, that's a big mistake
one misguided word, man that's all it takes
i know that i was wrong now
i wish i'd never said those things i said to you
i wish i could take them back
now i wish that i could take them back
all the things i said to you i never meant to say to you
cause it gets so hard for me to say
i'm sorry and i never meant to hurt you in any way
my tongues on fire and i bit off your head
i know i hurt you i never really cared
i know that i was wrong now
i wish i'd never said those things i said to you
i wish i could take them back
now i wish that i could take them back
all the things i said to you i never meant to say to you
