

Moron

Sum 41

It's hard enough to even fake your smile
This solution, I'm in denial
There's something missing cause I can't feel a thing
I'm desensitized You can fake this and
I can't take anymore
I'm not so tough I can't ignore
You can fake this and
I can't take anymore
I'm not so tough I can't ignore
Anymore All this confusion is running deep inside my head
How long can I keep this up before I end up dead? Can't believe that it could come to this
It's only feelings so I can't resist
I'm falling deeper in denial but I still try to
Believe in something
