Loverman

Vassy

I want to use my hands on your body,
I want to explore your rivers and your valleys.
From the top of your mountain to the depths of your sea,
I want to fuel the fire inside of me.
chorus
I'm your loverman, digging as deep as I can
I'm your loverman and I try for. I try for
I'm your loverman, going ask for best I can
I'm your loverman and I try for. I try for

I want to look in your eyes, pass the mask you hide behind
I want to know all of you, what makes you smile what makes you blue.
You know I want to please you, take you so high. Forget that you can't fly were just spaceships in the night.
Your ripping your clothes off of the past

making a new path and a brand new day
baby come with me I'll take you away
I'm your loverman, digging as deep as I can
I'm your loverman and I try for. I try for
I'm your loverman, going ask for best I can
I'm your loverman and I drive for. I drive for
je t'aime mi amore, je t'aime mi amore
je t'aime mi amore, je t'aime mi amore
From the garden in Versailles, to the desert in Duba
