Love Session

Ghostface Killah

Just like a fresh pair of Royals on the first day of school
It was love, even from the jump I spoiled you
Before the fame camera cars and the glitter
Though my occupation is tasty, for God's sake, it came with the bitches
But that's on another note, let me explain here
Right now, sugar on how I feel for you
Like when we, uh, yo, I get these crazy chills from you
And when we done, yo, I know the perfect meal for you
The mashed joints, big onions on sauted fish
Little Royal, candle and one big kiss
You my pumpkin and my 'nilla custard, you cussed me out
When you found condoms layin' in my pocket, I was busted
I gets right witchu, form a life with you
The type after sex get a warm rag and then wipe you
Hyped up love, light it up, might bite you at the altar
I'm bitin' off you, I'm wearin' white too
Ain't it funny how tables turn, chase you all around?
Change your life, baby, 'cause I love you baby
Stuck with me through the thick and thin
Through the pain and strife the love of my life
Said that it will never last
But I'm here by your side, the love of my life
And I'm here that's my word
Only fight you when we makin' love, that's what I call it
Burnin' the chronic, we laughin' while I'm shittin' on the toilet
Camcord it, happy times record it, the time you asked me
For them blue Nike's, I was like, "Boo, I can't afford it"
I was fucked up, plus, I was stuck, Starks the King
Hit the block and still scraped up, eighty beans
How you like them apples? My technique is Taye Diggs
Your attitude is right, that's why I made you my Wiz
The only girl that can make my shit jump, with the slightest touch
You at the stove while I'm grabbin' my stuff
God forbid, somethin' happen to us
Let's remain and friends and discuss our troubles and might try again
Word to my iron pen, it's not good to hold the cryin' in
I feel the same way your heart's trapped in the lion's den
Iron Man, I am him
It's the beauty in our souls through Allah, where the love lies within

Can't believe you found love in me through everything
Held me down like my boys in the streets, here's the ring
Whatchu wanna do? Whatchu wanna do?
Can't believe you found love in me through everything
Held me down like my boys in the streets, here's the ring
Whatchu wanna do? Whatchu wanna do?
Stuck with me through the thick and thin
Through the pain and strife the love of my life
Said that it will never last
But I'm here by your side, the love of my life
Every part of me, every thing I've done
Is still there, still there, still care, oh
Always been there, baby
I don't wanna and I don't wanna cry no more, baby
And I love and I love and I love you, girl
Stuck with me through the thick and thin
Through the pain and strife the love of my life
Said that it will never last
But I'm here by your side, the love of my life
