

# You Burn First

[Alexisonfire](#)

I said, "Cover me if there is a fire  
'Cause I want you to burn first"  
She screamed at me, "I want to be desired"  
I said, "Easy girl, I know it hurts" Let's all give thanks that I am a liar  
'Cause I've got a feeling, I just might get worse  
Now there's nothing wrong with you, I'm just tired  
And I'm in a mood for a brand new curse You burn first  
You burn first  
You burn first  
You burn first "Cover me if there is a fire  
'Cause I want you to burn first"  
She screamed at me, "I want to be desired"  
I said, "Girl, I know it hurts" Let's all give thanks that I am a liar  
'Cause I've got a feeling, I just might get worse  
Now there's nothing wrong with you, I'm just tired  
And I'm in a mood for a brand new curse
