

# Live And Let Die

## McCartney Paul Wings

When you were young  
And your heart was an open book  
You used to say live and let live  
But if this ever changing world  
    Which we live in  
    Makes you give in and cry  
    Say, live and let die  
    Live and let die  
    Say, live and let die  
    Live and let die, ohh yeah  
    What does it matter to you?  
    When you got a job to do  
        You got to do well  
    You got to give the other fellow hell

    Say, live and let die  
    Live and let die, ohh yeah  
    Live and let die  
    When you were young  
    And your heart was an open book  
    You used to say live and let live  
        But if this world  
        Which we live in  
        Makes you cry  
    Say, live, live and let die  
        Live and let die  
    Live and let die, ohh yeah
