Say What You Want

Rosie Thomas

First off tell me what's your name dude who are you Man I'm you I'm KJ Five Number 2 man How can that be man you aint me man I'm 52 what are you KJ Five Three man? Nah see I'm the rapper that yo u used to be Before you sold out and started rapping so pathetically I came from the past to battle me? That's right because you forget what means to be an emcee Oh I get it cause I'm popular now And I got a dove award I forgot the underground You think I forgot how to throw it down And I can't hold my own that's what your saying to me now? Yeah that's right and what I'm saying is You're a biter you write your songs for youth group kids Dear slim a gimmick everybody's knowing this Oh you think so we can find out about this

> You can say what you want yep But I really don't care I really don't care

First of all fools like you get devoured You aint wack you like wack to the 7th power I'm a go ahead and expose all ya gimmicks And leave ya blown out like a tire with a hole in it You don't' get it battling me that's risky Your last CD was wack but it made a nice Frisbee You can't be expect now not to get exposed When your style's such a copy I could pick it up at Kinkos How you gonna run up in the place When your eyebrows look like they exploded off your face Knowing your rock the pair of same socks for 3 days Dude is so white he probably bleeds mayonnaise I'm sorry don't get all mad Cause your teeth look like you just brush em with a brillo pad Don't be sad that's not what I mean I mean it smells like an animal went and died between ya teeth but...

I'm all up in your atmosphere and I'm blowing out your mind like sticking dynamite in your ear

Yeah don't even try to step

When the rhymes are so tight you could use them for spandex you should know when to quit cause I aint feeling you like I chopped off my fingertips see I aint even bluffing

I could take you without saying
how you gonna get all up on it

When your forehead so big I could write my next song on it
I didn't mean it dog gone it

I meant the junk is so big I could pull out a paintbrush and draw on it

Don't be looking at me strange

When your hair is so greasy I think it needs an oil change
Fo sheezy I'm the real 52

Welcome to the city of wackness population only you

You gonna have to shut your mouth So you can finally see what the ki is all about Yeah no doubt I'll be the first to admit it That since I started now a days I rap a lot different But c'mon man you got to be kidding I cant stay the exact same way now be realistic Music evolves that's being artistic There's just one thing that stays consistent Its just Jesus first in every single lyric Hopefully that's apparent I care less if ya feel it Label what I do as nothing more than gimmicks In fact label me a sell out in fact I agree with it Sold out to Christ sold out my life Plus I sold out the show I did last night And if I sold out to doing God's plan And that makes me a sell out that's what I am then
