

# My Guiding Star

**Delroy Jones**

Where are you my guiding star  
Did you just vanish from sight, a comet passing in flight  
How could you go when you must know  
How precious and how dear to me you are? I need you my guiding star  
Without you shining for me I have no reason to be  
So through the night love I'll search for your light, Lord  
Where are you? Where are you my guiding star?
