Already There

The Verve

Seen it all, I'm already there
Seen it all, I'm already thereSave your books and your pills
I don't need them, I'm there
Save your books and your pills
I don't need them, I'm thereYou can do anything you want to
All you've got to do is try
You can do anything you want to
All you've got to do is tryI thought my best days had left me
My best years had left me behindThen I watched them come back
Then I watched them come back to me
And all the wild eyes
All the wild eyes, know what I meanIf trees cut stars and eyes to heaven
I'll bend them back and bend them again
If my skin looks tired and ol' from living
I'll turn right back and live it againYou better pray when the music stops
And you're left alone in your mind
'Cause I'll be hearing music till the day I dieThen I heard it turn off
I swear I heard the screams
And all the wild eyes
You know what I mean
They're scared they've lost their dream
They press down on me
You know I thought I was thereHello, high, are you? Yes
That explains it
Oh, you were walking 'round like some kind of angel
You were walking round like some kind of angelHello, high, are you? Yes
Well that explains it
Well that explains it
