Walk With Me

Chris Spheeris

Wandering through a misty night
Searching for some signs of light
I find you
Through a tunnel in the deep
Past the corridors of sleep
I find you.

Open armed you're standing there
Golden light surrounds your hair
My eyes can't look away
Voice in a familiar tone
Tells me that I'm not alone
I hear it say:

Walk with me
Through the mysteries of night
Through the shadows and the light
You will find me there
Hold me now
Through the weak and the strong
Know our hearts will belong
To the one love we share.

Years I asked the silent skies
To shine some light into these eyes
I found you
Tears of joy now trace my cheek
A salty kiss, I tremble weak
I've found you.

Entering your body's flame
Our souls unite to share one name
It takes my breath away
Voice arises deep within
Telling me I'm free again
I hear it say:

Walk with me
Through the mysteries of night
Through the shadows and the light

You will find me there
I'll hold you now
Through the weak and the strong
Know our hearts will belong
To the one love we share.
