

Never Let It Die

Hatebreed

The flame was almost extinguished and the will had faded and escaped from me
Two years had passed and they wilted away
All that was left were memories of days I never lived Now the fight is on, until there's nothing left
I'll fight like never before
The fight is on, until my final breath
I've never wanted anything more I (I) must (must) never let it die(x2) Bonds are strengthened when they've been
tested
and mended when they've been torn
so give all of yourself that there is to give
cause in life to have never risked is to have never lived Now the fight is on, until there's nothing left
I'll fight like never before
The fight is on, until my final breath
I've never wanted anything more I (I) must (must) never let it die (x4) So resolve, reassure and push on with out
fear
Ignite the flame, because only you govern what tomorrow holds
It's inside us all waiting to be awoken
It's more than words describe
This is the spark, let it burn, make it build
It will never be denied Because the fight is on, until there's nothing left
I'll fight like never before
The fight is on, until my final breath
I've never wanted anything more I (I) must (must) never let it die(x4)
We will let it die, NEVER(x7)
NEVER, must never let let it die
I must never let it die(x3)
