

You (feat. Roger Wang)

Tony Leo

It's hard to realize that things can change your life

Time is like your enemy

Wondering what to do, wondering where to go

Future is like fantasy

Then I heard about you

The battles and the pain

Now I realize that

Time could be my friend

The road is easy now I can clearly see

You straightened out the path for me

You showed me what to do

You showed me where to go

My dreams can be reality

How can I thank you?

Would we meet someday?

It's all because of you

I can face another day.

You gave yourself away

So I could breathe again

You gave yourself away

So I could breathe again
