

# Out of Nowhere

## Solitaire Miles

Seven out a twenty one knocked down now only fourteen left to go  
I didn't know that I was next in line but it is not as if I had much time  
Jet black all around me voices calling saying, "Please don't go away"  
Last thing I remember drifting down this tunnel was bright light ahead

Out of nowhere, it came and hit me on the head

Out of nowhere

I saw it over there before it hit you on the head

I saw it over there

Out of nowhere it came and hit me on the head

Out of nowhere

I saw it over there before it hit you on the head

I saw it over there

Seven out a twenty one knocked down now only fourteen left to go  
Didn't know that I was next in line but it is not as if I had much time  
Jet black all around me voices calling saying, "Please don't go away"  
Last thing I remember drifting down this tunnel was bright light ahead

Then when I came around somebody helped me to my feet

And said, "I believe you're still alive"

I seen twenty other people in the last half an hour

Who've been hit right between the eyes

It seems that somebody somewhere's on a mission to protect

You 'cause there's no way that you should've survived

Hurrah, hurrah, hurrah , hurrah

We're still alive

Out of nowhere, it came and hit me on the head

Out of nowhere

I saw it over there before it hit you on the head

I saw it over there

Out of nowhere, it came and hit me on the head

Out of nowhere

I saw it over there before it hit you on the head

I saw it over there

Out of nowhere it came and hit me on the head

Out of nowhere

I saw it over there before it hit you on the head

I saw it over there

Out of nowhere
