

# The Upside Of Down

Chris August

The downside of being up is my inside is empty of  
The one thing my heart truly needs  
When I feel invincible a million miles from miserable  
It's always all about me I don't know why I don't love You like I should, like You would  
Through bad and good oh Funny how we figure out where happiness is found  
In the midst of this sadness I'm closer to You now  
And that's the upside of down, the upside of down  
It's all switched around, I lost and I found  
The upside of down You are more in my less, You are strength in my weakness  
I'll never go back again  
And then Your sunshine ends the rain and I return to my old ways  
Why am I a fair weather friend? I wanna be the one to love You like I should, like You would  
Through the bad and good oh Funny how we figure out where happiness is found  
In the midst of this sadness I'm closer to You now That's the upside of tragedies knowing You're holding my  
heart always, always  
I may be down but I'm finding there's joy in the pain, in the pain Funny how we figure out where happiness is  
found  
In the midst of this sadness I'm closer, I'm closer to You now and oh Funny how we figure out where happiness  
is found  
In the midst of this sadness I'm closer to You now  
And that's the upside of down, the upside of down  
It's all switched around, I lost and I found  
The upside of down The upside of down  
It's all switched around, I lost and I found  
The upside of down
