

# Long Way from Home

Britny Fox

Seemed so far away  
Don't know what I missed  
You're my scattered skies  
Think of home I missI see your face in the distance  
Envision you at night  
Miles of the tears and pain  
It sometimes a lonely gameRising sun, brightest star  
Round the world, I love her  
The end of time, for you girl  
I'm comin'My love's with you always, oh yeah  
Long way from homeMy love's with you even  
When I'm miles away  
I left a kiss in your hand  
Just hold it tight and prayRising sun, brightest star  
'Round the world, I love her  
The end of time, for you girl  
I'm comin'My love's with you always, oh yeah  
Long way from home  
Just call me, just call me again  
Long way from homeMy love's with you always, oh yeah  
Long way from home  
Just call me, just call again  
Long way from homeMy love's with you always, oh yeah  
Long way from home  
Just call me, just call me  
Long way from homeMy love's with you always, oh yeah  
Long way from home  
Just call me, call me again  
Long way from homeMy love's with you always  
Long way from home  
Long way from home  
Long way from home
