Galaxy

Dufresne

Between Mars and Jupiter
There's a gap
For another planet
Now way back yeah
Maybe a mad man
Just blew the shit
Out of it
Now we're tryin'
To get back
In alignment
Explains why we
Go through cycles
Always tryin' to find it
Closin' into the age
Of aquarius
Crazy weather
Floods Tornadoes
Low jet streams
Not gettin better
Enterin' a twilight zone
Activities grown
Every single day
More people spottin' UFO's
Let's come together with this
New coast shit
we got the motherfuckin' kids
Now let's freak this shit
It's messed up when you're feeling
Everything is wrong
takeover the Pentagon

It's fucked up in this paradigm
'cause i'm burnin' fossil fuels
I dont even need too
free energy has been harnessed
we don't use it why
'cause the techniques been suppressed
the hours glass has passed through granules
thats cool we gotta break it

bust all these rules and switch
change up the pitch
rearrange our views and this
dumb shit we'll ditch
chorus
I found a bootleg of the cosmic conscious
then erased it
visualized the breath technique
slowly became it
now something is watchin' me
since i have found the keys
to free this energy
my high speed light body
'cause the galaxy is crazy
it doesn't amaze me
that we're livin' out of phase
and quickly decaying
6 protons, 6 neutrons, 6 electrons
is encoded in this plane
we live on
