Laika

Sticky Fingers

I feel it, running in my veins, struggling with breathing
Suffocates my brain
There's no air in gravity's erase I am the runaway dog
They sent me into spaceIt's a little planet, flying through the stars
I don't wanna sit down, how much did I cost
Light speed, but i'm feeling kind of slow
Gazing out the space screen, memories belowMaster - Why'd you have to leave me?
Didn't have to deceive me, we were friends
Slingshot - Hurts that i'm not dreaming
Slowly over heating - You shook my handSilence - a neon glow lights up
A crackle of a speaker, then everything goes dark
And there's nothing, except this floating dream
I'm flying by the moon now I think it's time to sleep
I think it's time to sleepMaster - Why'd you have to leave me?
Didn't have to deceive me, we were friends
Slingshot - Hurts that i'm not dreaming
Slowly over heating - You shook my handAnd i'm lonely - Taking in the moonlight
It's not time for spaceflight
For this dog
Was it worth it? Worth it breaking trust
Worth the weight of love we have now lost
We were friends
We were friends
