

# Lions Roar

## The Hush Sound

The lions roar and young men soar  
The flames all scorch the circus floor  
Puppets on string all dance and sing and flap their wings  
Trumpets play sick lullabies

Delicate dame her fragile face  
Was scared away without a trace  
Out in the cold, where did she go?  
Into unknown a place I'll never

Know and the desperate search began  
All across this sea and land  
I just knew I'd find you here  
I just knew I'd find you

Elephants rear and young men steer  
The audience just claps and cheers  
I asked around half empty towns  
About a girl nowhere to be found

And the desperate search began  
All across this sea and land  
I just knew I'd find you here  
I just knew I'd find you

We didn't know, we could not go  
The circus songs just carried on  
Out of the crowd three men rush out  
And scream and shout, "Everybody Stop!"
