We Drink Your Blood

Powerwolf

Our mother God we hold the sword in holy times

We are the war, we never see the light

The order call, we all will take more human wine

And we toast to the nightWe fold our hands, we keep the bible in our minds

Our father God, we are the hordes of Cain

And though you run we will take you and we find

Any type, any veinWe drink your blood

When the midnight sky is red

We drink your blood

And we call the sanguine saints

We drink your blood

When the midnight sky is red

We drink your blood

And we open your veinsOur father lord, we are the demons of the wild

When all we pray, stand the fight as one

We tame the storm, we are the martyrs in the light

Take your soul when you run

We are the dark, we are the saints of blood at night

We hear the call, when the moon shines red

We grab your body, in morning all we are

Satisfied when you are deadWe drink your blood

When the midnight sky is red

We drink your blood

And we call the sanguine saints

We drink your blood

When the midnight sky is red

We drink your blood

And we open your veinsWe drink, we drink, we drink your blood

Kyrie eleison

We drink, we drink your blood

Kyrie eleisonWe drink your blood

When the midnight sky is red

We drink your blood

And we call the sanguine saints

We drink your blood

When the midnight sky is red

We drink your blood

And we open your veins

We drink your blood
