Oceans

Novice

I'm falling apart and I hope you got the news
'Cause you're the only cure
I need an extra dose tonight
We're oceans apart
I'm thinking of you and I know
This space is hard for youYou said it's getting hard to breathe
And there's nothing I can do
So let's just break away, break away
From all of this
You said, you need to stay, need to stay
I need you here with me tonight'Cause time stands still when you're around
You can make the stars, call out your name
You can make this ocean weigh, it's calm
'Cause time stands still when you're around
And every thought of you gives me hope
To see this through another dayI'm lying awake tonight, these days go by so slow
Your picture's staring down at me
It's singing me to sleep
You are the sweetest thing, sweetest thing I've ever seen
You make all the gray fade away
You bring color to my life'Cause time stands still when you're around
You can make the stars, call out your name
You can make the ocean weigh, it's calm
'Cause time stands still when you're around
And every thought of you gives me hope
To see this through another dayYou're so beautiful and I'm coming clean
This is more than I can take
And when I sleep I dream of you, so don't let go
'Cause I'm holding on to every thought of you'Cause time stands still when you're around
You can make the stars, call out your name
You can make the ocean weigh, it's calm
'Cause time stands still when you're around
And every thought of you gives me hope
To see this through another day
