

Scum

Anti-Nowhere League

I see images of our decay
Should we bow our heads today
Images of refugees suffocating humanity
There's no solution to world pollution
And overcrowded Population
Images of scenes to come...
We cannot hide... we cannot run
I see images of modern life
The things we have... we sacrifice
Images of television pouring out more terrorism
Man and rats will be as one
Crawling through these streets of scum
I see images of Jesus Christ
Strung up on his cross of ice...
No more law and no more rule
No more books and no more school...
I see images of forests dead
Blackened waters and skies of red
Images of forgotten laws,
computer age, atomic wars
There's no solution to world pollution
And this overcrowded population
These images are of things to come
You cannot hide, You cannot run...
