My dear

Đ'ĐμÑ€Ñ•Đ,Đ,: #1#2

All of the world on one side, you another side my dear my dear

All beautifuls on one side, you another side my dear my dear

Little by little your love came into my heart, now my life depends on your life my dear

Despair talisman in my heart got broken, now my life depends on your life my dear

You came into my heart

Opened your eyes widely

Saw and found a great place forever, found a great place

Not for one or two days, forever

Stay stay in my heart, stay because you are my darling now

All of the world on one side, you another side my dear my dear

All beautifuls on one side, you another side my dear my dear

Little by little your love came into my heart, now my life depends on your life my dear

Despair talisman in my heart got broken, now my life depends on your life my dear

All of the world on one side, you another side my dear my dear

All beautifuls on one side, you another side my dear my dear

Little by little your love came into my heart, now my life depends on your life my dear

Despair talisman in my heart got broken, now my life depends on your life my dear

You came into my heart

Opened your eyes widely

Saw and found a great place forever, found a great place

Not for one or two days, forever

Stay stay in my heart, stay because you are my darling now

All of the world on one side, you another side my dear my dear

All beautifuls on one side, you another side my dear my dear

Little by little your love came into my heart, now my life depends on your life my dear

Despair talisman in my heart got broken, now my life depends on your life my dear
