

Stellar Plains

Enforcer

Break out! From the cosmic cell that holds you

Stick the earthy line of death and lie

Break through! The eternal sea of eons

Crash, loosen of the three dimension worldEnter the reality below!

Light years from the world you used to know!Out through stellar plains I'm running out

Out through stellar plains I'm running out

Out through stellar plains I'm running out

Out through stellar plains I'm running out

Break out! The bonds of energy and matter

Annihilate the force of gravity

Break thought! dissolve the laws of constant order

Create a force to rip the universe apartEnter the reality below!

Light years from the world you used to know!Out through stellar plains I'm running out

Out through stellar plains I'm running out

Out through stellar plains I'm running out

Out through stellar plains I'm running outEnter the reality below!

Light years from the world you used to know!

Out through stellar plains I'm running out
